

MICHIGAN DEPARTMENT OF CORRECTIONS - BUREAU OF HEALTH  
CARE SERVICES

---

PATIENT: DERICO THOMPSON  
DATE OF BIRTH:   
DATE: 01/06/2020 6:52 AM  
VISIT TYPE: Provider Visit-scheduled

---

Chief Complaint/Reason for visit:

This 45 year old male presents with lumbago: late entry 1/2/20.

History of Present Illness

1. Lumbago: Late entry 1/2/20

Additional comments:

9/25/19: Patient suffered injury to low back ~9/17/19. He states he was row lifting 95#s and developed a spasm in his low back with RLE radiculopathy. He describes it as being in the lateral aspect of his hip to his knee (burning). He was seen by nursing for initial treatment. The back spasm has resolved but he still has the discomfort in his leg. No B/B incontinence. No saddle anesthesia. 10/3/19: patient states he continues to experience sharp/burning pain in the lateral thigh and now extending to his lateral calf (L5-S1 dermatome). He had brief improvement with Toradol and Prednisone. He has been doing simple stretches. Physical exam reveals intact DTR's, straight leg raise positive on the right. Generalized tenderness right lumbar. Patient has completed his HEP and has had no improvement. He has to sit to use the phone, microwave, etc otherwise his back will spasm.

Medications Active Prior to Today's Visit

Drug Name	Dose	Qty	Description
Prednisone 1/3/2020)	10 Mg	1	Take as directed on package (from stock: start
Naprosyn	500 Mg	60	take one tablet twice a day as needed

Allergies

Allergen/Ingredient	Brand	Reaction:
Nka		

Physical Exam

Constitutional:

Level of distress is mild distress, due to pain. Nourishment type is well developed and well nourished. Overall appearance is age appropriate and good hygiene.

Vascular:

Pulses

Dorsalis pedis pulses: normal. Posterior tibial pulses: normal.

Back / Spine:

Comments: See HPI

THOMPSON, DERICO

**Extremities:**

Dorsalis pedis pulses: normal.

Posterior tibial pulses: normal.

No edema is present.

**Neurological:**Level of Consciousness: Normal.Orientation: Alert and oriented X 3. Grossly normal intellect.Memory: Intact.**Psychiatric:**

The patient's affect is normal.

---

Offender Name: THOMPSON, DERICO J	Sex: M	Off #: 0234651
Date of Birth: [REDACTED]		Facility: KCF
Encounter Date: 07/15/2020 11:32	Provider: Stallman, Timothy [TS4]	Unit: E2

---

MP UNR encounter performed at Clinic.

**SUBJECTIVE:**

COMPLAINT 1 Provider: Stallman, Timothy [TS4] DO

Chief Complaint: Musculoskeletal

Subjective: 45 year old male, medical history of CBP, presents for a symptom and medication review. 3/11/20 MRI LS spine 'mild lumbar DJD, L4-L5 moderate central canal stenosis and bilateral neural foraminal stenosis, moderate sized broad based central disk herniation, L5-S1 small focal central disk herniation with bilateral neural foraminal stenosis. Patient has an EMG scheduled in the near future. Onset of the back pain 9/2019, states he was doing "bend over roll", "90 #", states felt something at the time of the injury, 'sharp pain' with radiation to the lower leg, radiating to the right and left. Content of the pain is "up there, an 8 or 10". Better with no known cause, sometime with positioning, had been on relafen, "don't work". Activity at present includes pull ups and dips. Sleep is "terrible" hard to sleep, some nites better than others.

DATE OF EXAM: 09/30/19

FACILITY OF EXAM: OFF-SITE

TYPE OF EXAM: LUMBAR SPINE, SIX VIEWS

FINDINGS: Side bending to the left is present. Mild facet joint arthritic changes are present of the lumbar spine. Loss

of height of the intervertebral disc space at the L5/S1 level represents degenerative disc changes. The vertebral bodies

are normal in size and shape. Marked fecal debris is seen throughout the course of the colon and rectal area to represent constipation.

IMPRESSION:

1. Mild facet joint arthritic changes of the lumbar spine.
2. Degenerative disc change at the L5/S1 level.

**Pain Location:**

Pain Scale:

Pain Qualities:

History of Trauma:

Onset:

Duration:

Exacerbating Factors:

Relieving Factors:

Comments:

**OBJECTIVE:**

**Exam:**

**Abdomen**

**Inspection**

Yes: Normal, Flat

**Musculoskeletal**

**Other**

MS with normal thoracic AP curve, slightly accentuated lumbar lordosis[sway back], slight forward carriage of the head. Equivocal to positive standing flexion test on the right, negative straight leg raising, subjectively positive

Offender Name: THOMPSON, DERICO J  
 Date of Birth: [REDACTED]
